Footnotes

1. See the table, "Calculation of Labor Share."
2. See the table, "Calculation of Gas Share of Passenger Cars."
3. Although this item, following the NIPA classification, is listed here, it is not treated as an expenditure item in our framework. Rather, as we noted earlier, "Government-administered Lotteries and Parimutuels--GLOT" is considered as a kind of tax attributable totally to workers and the rest, "Publicly-owned Liquor Store Systems" and "Other" - GELIQOSP, after netted is treated as a part of surplus-value. See the table, "Calculation of the Surplus-value and the Rate of Surplus-value."
4. Since the COMACT throughout 1952-1980 has been negative, in order to obtain the total expenditure in nominal terms it must be netted from TOTEXP, hence TOTEXPL.
